

IPL TREATMENT

**Eyes going through a dry spell?
IPL treatment might be right for you.**

Intense Pulsed Light (IPL) is a drug-free, drop-free treatment for Dry Eye Disease, using gentle pulses of light on the skin around the eyes. In just four 20-minute visits, IPL addresses the underlying cause of Dry Eye by liquefying clogged eyelid glands and treating inflammation. And the bonus? IPL can improve the skin's texture, tone, and color.

Contact VisionPoint Eye Center at **309.662.7700** to learn more about how you can benefit from IPL.
